DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-10 and 40, drawn to a material mixing device having a first port, a second port, a first passageway, and a movable seal in the second container, classified in class 604, subclass 82.
- II. Claims 11-15, drawn to drawn to a material mixing device having a housing, a first port, a second port, a first passageway, and means for compressing the second compressible container, classified in class 604, subclass 83.
- III. Claims 16-22, drawn to a container pressurization device having a housing, a port, a passageway, and gas storage means, classified in class 604, subclass 140.
- IV. Claims 23-37, drawn to a material mixing device having a housing, a first port, a second port, and first, second, and third passageways, classified in class 604, subclass 84.
- V. Claim 38, drawn to a material mixing device having a housing, first second and third ports, and first and second passageways, classified in class 604, subclass 85.

The inventions are distinct, each from the other because of the following reasons:

Inventions I-V are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown

to be separately usable. In the instant case, invention I-V has separate utility in view of the structural differences indicated above. See MPEP § 806.05(d).

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.
